Patent and utility model protection

Opposition and appeal proceedings

Dr. Henning Lülfi holds a doctorate in chemistry and was admitted as a German Patent Attorney, European Patent Attorney, and European Trademark and Design Attorney in 2017.

Legal Practice

Dr. Lülfi has been working in the field of intellectual property since 2013. After working for renowned patent law firms in Hamburg and Munich, Dr. Lülfi joined the law firm Wallinger Ricker Schlotter Tostmann in 2017.

His practice focuses on drafting patent applications and conducting European and German patent prosecution proceedings, conducting patent opposition and appeal proceedings, and preparing patent infringement and FTO opinions.

Dr. Henning Lülfi

Dipl.-Chem.

Career

since 2017

Patent Attorney at Wallinger Ricker
Schlotter Tostmann
Admitted as German Patent Attorney,
European Patent Attorney, and Euro-
pean Trademark and Design Attorney

since 2013

Active in the field of intellectual property
Doctorate at the University of Strasbourg
in the field of nanotechnology

until 2013

Studies of chemistry at the Westfälische
Wilhelms University Münster

Technical Expertise

Green Technologies

Materials Science

Chemistry

Legal Expertise

Patent and utility model protection

Opposition and appeal proceedings

Technical Background

Dr. Lülfi studied chemistry at the Westfälische Wilhelms-Universität Münster and completed an industrial internship of several months at BASF in Brazil (Guaratinguetá, SP) in the field of analytical chemistry.

As part of his diploma thesis, Dr. Lülfi worked on the synthesis of transition metal complexes (especially platinum(II) complexes) and their application as emitters in OLEDs. In 2013, he obtained his PhD in nanotechnology from the University of Strasbourg, where Dr. Lülfi focused in particular on the synthesis and functionalization of nanoparticles and their application in nanomedicine and electronics.

Dr. Lülfi's technical expertise mainly covers nanotechnology, polymer chemistry, „classical“ organic and inorganic chemistry, and medical engineering, but also extends to other fields, especially the border area between chemistry and engineering.

Dr. Henning Lülfi

Dipl.-Chem.

Memberships

- + Chamber of Patent Attorneys (PAK)
- + Institute of Professional Representatives before the European Patent Office (epi)
